FLOW

Introducing the future of
unified communications

ARE YOU STRUGGLING TO MANAGE MULTIPLE APPLICATIONS AND THE COMMUNICATIONS OF YOUR EVER-MOBILE WORKFORCE?

Working environments are changing. And many businesses are looking to move away from on-premise solutions to more effective cloud-based technologies that can help them maintain productivity and maximise profits.

THAT'S WHERE INVOSYS FLOW COMES IN...

Invosys Flow is a unified communications (UC) product that combines the market-leading functionality of Invosys' inbound calling platform (Number Manager) with the messaging and video conferencing functionality developed by Telavox's renowned UC application.

FLOW

WHY CHOOSE INVOSYS FLOW?

Invosys Flow is one of the most flexible and straightforward unified communications platforms available on the market, thanks to its core functionality...

CALL:

- Access contacts across the globe
- Flexible CLI presentation
- Dynamic presence and profiles
- Customised voicemails
- Call fraud protection

MESSAGE:

- Instantly communicate and share content between teams
- Document sharing
- Personalised voicemails

MEET:

- Hold video meetings on the fly
- Accessible on browser/desktop/mobile apps
- Microsoft and Google Calendar/Contacts integration

PLUS, SO MUCH MORE!

- Queues • Unlimited hunt groups • Pre-connection greeting • Area-based routing • Outbound call barring controls • Whisper announcements • Time-of-day routing • Disaster recovery plans • Date/caller exceptions • Reporting/statistics • Call recording and retrieval • Number management and porting
